LIVING HEALTHIER together

A guide to Vision 2020
Welcome to **Vision 2020.**

**Our Vision:** Living healthier together.

**Our Mission:** To enhance the health of the people we serve.

We live in a time of change, growth and innovation. Our lives are more connected, with access to information right at our fingertips. We're forming partnerships and friendships beyond our towns, neighborhoods and families.

Health care is changing, too. It’s evolving to be present in our lives every day—not just when we’re sick.

We embrace this spirit of change with our Vision 2020: *Living Healthier Together*. We’re partnering with you, your family, doctors, and other community caregivers to change health care for the better—to create a new system of care.
Vision 2020 (V20) will create a new system of care.

By 2020, Anne Arundel Health System will transform health care as you know it. The outcome—higher quality, lower cost health care.

Our Goals

**Individual care:** We focus on you and your family. Care teams collaborate with you, invite you into the decision-making process and empower you to be more in control of your health.

**Affordable care:** We provide the right care at the right place at the right time. Our efficient, quality care utilizes the latest technology to increase treatment accuracy and reduce cost, while focusing on connectivity, information sharing and accessibility.

**Community care:** We are dedicated to working outside the walls of our hospital. We bring better community health, wellness and quality of life through partnering with caregivers, learning institutions and community groups.

- Reaching **beyond** the hospital walls
- Centered **on you**
- Partnering and **collaborating** to improve care
- Using the latest technology and focusing on connectivity
Driving **quality** through evidence-based practice

Communicating openly and sharing information with you

Providing efficient, **responsible** and affordable care

Serving and understanding the **diversity** of our patients and community

Growing to meet the needs of our community
Strengthening our core values.

Five core values have guided us through the past decade. To meet the challenges of the future, we've recognized two additional values that will be critical to guiding us to 2020.

Our enduring core values:
Compassion
Trust
Dedication
Quality
Innovation

Our newest core values:
Diversity
We benefit from our differences as we build toward a common vision. Diversity is our daily experience; a journey, not a destination.

Collaboration
We strengthen partnerships with our community—our medical staff, civic organizations, businesses, government agencies and educational institutions.

Healthier: a goal that reflects our personal and community health, our relationships in society and our economics.

We are heartier and more vigorous in all our endeavors.
Healthier: a goal that reflects our personal and community health, our relationships in society and our economics. We are heartier and more vigorous in all our endeavors.
Building to 2020

Comprehensive electronic medical record

One of the nation’s 100 Top Hospitals

One of the Most Wired hospitals and health systems in the nation

A green leader: the only LEED Gold certified patient care tower in Maryland

Maryland’s leading hospital in patient experience

Celebrating past successes: In the mid 1980s, we began to transform 100 acres of undeveloped land into the beautiful campus that has become a focal point of the region. Vision 2010 was about expansion—building our medical park campus, adding programs and services and preparing the infrastructure that would one day hold the services and technologies our patients needed and expected of us. This steady growth positioned us to move toward Vision 2020.
Getting there together.

Higher quality, lower cost: We're connecting you to a robust network of care. To get there, we're focusing on major initiatives that will change healthcare as we know it.

V20 initiatives

- Employee health & wellness
- Patient & family centered care
- Sustainability & efficiency
- Empowered workforce
- Clinical integration & care coordination
- Strategic growth
- Evidence-based practice
Imagine a new kind of health care. More vital. More you. It's personalized care that puts you at the center. It's flexible health care that operates beyond the hospital and doctor's office. It's wherever and whenever you need it.

At the core of this system of care are partnerships, relationships and connectivity. You, your doctors and hospital share information and accountability.

Our pledge: a system of care that ensures we are living healthier together.
