NOTICE - Access to Support for Patients with Disabilities in Health Care Settings  
(September 24, 2020)

All licensed Maryland hospitals, related institutions, freestanding medical facilities, freestanding ambulatory care facilities, chronic disease centers, hospice care facilities, comprehensive rehabilitation facilities, nursing homes, and assisted living programs (collectively health care providers) shall adopt policies on or before October 1, 2020 that both comply with applicable U.S. Centers for Disease Control and Prevention (CDC) guidance and State and federal regulations and recognize the rights and needs of individuals with disabilities. This Notice replaces the Notice to Patients with Disabilities in Hospital Settings from May 11, 2020.

Such policies shall include, at a minimum:

- Provisions authorizing support persons to accompany, visit, and stay with individuals with disabilities during their visits to health care providers.
- Provisions for the designation of support persons who may accompany, visit, and stay with individuals with disabilities during their visits to health care providers.
- Provisions defining a support person as a family member, personal care assistant, similar disability service provider, or other individual knowledgeable about the management or care of the patient who is authorized to assist the patient in making decisions.
- Provisions establishing a process for individuals with disabilities to propose other reasonable accommodations that also comply with the health care’s infection control policy.

Health care providers shall also adopt policies regarding communications with families and caregivers of patients with disabilities who do not have a support person present during the patient’s visit. Health care providers shall explain these policies to patients’ support persons, preferably before the patients arrive at the health care provider.

All support persons shall be subject to screening for COVID-19 symptoms upon arrival at the health care provider and periodically during their stay, if appropriate. Persons with COVID-19 symptoms shall not be permitted to serve as a support person and must immediately leave the hospital. In addition, health care providers shall provide appropriate PPE, and all support persons shall be required to don that PPE and comply with health care provider policies regarding use and conservation of that PPE.
All health care providers shall provide a copy of their policies regarding support persons for those with disabilities to all patients and shall post a copy of this notice in an area accessible to all patients. In addition, health care providers shall post a copy of the attached notice regarding remedies for violation of this notice in an area accessible to patients and shall provide a copy to all patients.

Failures to comply with this notice may result in the imposition of sanctions in accordance with applicable regulations.

Carol A. Beatty  
Secretary, Department of Disabilities

Robert R. Neall  
Secretary, Department of Health
